

MAYHEM

LIGHTER, STRONGER, FASTER, SMARTER!

The 2008 MAYHEM is the latest in high performance SLE design from Caution! Our design goal for the MAYHEM was to achieve an incredibly stable wing while still maintaining the most responsive, performance orientated kite on the market! The MAYHEM delivers impressive flying speed, remarkable upwind ability, and turning dynamics that our team riders rave about. After much experimentation with shape and profile, we have blended speed characteristics with stability, while maintaining Caution's balanced bar pressure, and precise turning characteristics. The MAYHEM is built with Caution's integrated Single Turbo Inflation System, featuring new sizing, ergonomic carbon bar with newly designed failsafe quick re-lease, and Caution's unique bomb proof seam construction.

WIND CHART

| Size | Int/Advanced | Bar size |
|------|--------------|----------|
| 7m | 18-45 | 50cm |
| 9m | 15-34 | 50cm |
| 11m | 12-28 | 55cm |
| 14m | 9-25 | 55cm |
| 18m | 8-21 | 55cm |

CAUTION KITES SANTA CRUZ , 135 Heath St.Santa Cruz, CA 95060
PH: (805)568-1420, FAX: (805)568-1421, E-Mail: sales@cautionkites.com
www.cautionkites.com

Sizes include: 7, 9, 11, 14, 18
(All Kites Measured in Flat Area)

Features and Benefits:

- Modified shape and profile for extreme stability
- Caution's proven Single Turbo Inflation System
- SLE design yields expansive wind range and largest projected area
- Swift Turning Characteristics with multiple attachment points to control turning speed
- Shorter bridles allow easier rigging and eliminate pre-flight tangles
- Tapered Speed Struts
- Safest style kite in the industry

Control Bar

- Precise steering characteristics
- Adjustable Bar pressure (ranging from low to fixed pressure)
- Variable bar throw with on-the-fly adjustable stopper balls
- User friendly 4 line bar: no Pulleys or needless clutter
- Ergonomic Carbon Bar prevents hand fatigue
- Spinning safety leash suitable for beginner through expert riders
- Quick-Fire Safety Release with newly contoured grab handle

Durability and materials

- Quality materials from industry leaders such as Ronstan, Teijin and Cousins
- Caution's quality bullet proof construction
- Glued and triple stitched seams
- Double ply trailing edge
- Low stretch panel layout

Kites come complete with

- Simple high performance Carbon 4 line bar
- Largest aluminum shafted pump in the industry
- Back pack carrying bag
